Culture: Tulips may be planted from early fall until as long as the soil is workable. They should be planted about 5 inches deep and 5 inches apart. A small quantity of sand in bottom of the hole is a help but is not necessary. If you cover them do not put covering on until after first hard freeze. When planted in groups, they produce a most wonderful and brilliant color effect, eclipsing in variety of color almost any other flower.

Good & Reese Lawn Grass Seed

OUR LAWN SEEDS have been procured from the same source for more than 25 years and testimonials prove that these seeds have given satisfaction wherever used.

VELVET SOD LAWN GRASS SEED—Composed of a variety of fine dwarf close-growing grasses which on properly prepared finely pulverized ground will produce very quickly a neat velvety lawn and permanent sod. Has given universal satisfaction for the past 25 years. 60c per pound.

WHITE DUTCH CLOVER SEED—Excellent for use on lawns; forms a close very dwarf herbage and remains green throughout the season and it is particularly suited to seashore lawns where it is difficult to secure a good stand of grass on the light sandy soils. We furnish the choicest grade of re-cleaned seed. Price, ½ lb., 40c; 1 lb., 75c, postpaid.

SHADY NOOK LAWN GRASS SEED—Shaded locations have often been found difficult to keep in grass. We have combined a mixture of grasses that will produce a perfect sward in the most densely shaded place. It must be borne in mind that too much shade creates sour soil and to guard against this apply air-slacked lime. Price, per pound, 65 cents.

Sow your seed between August 15th and November 1st, using on new lawns 1 pound of seed for 250 square feet. To replenish lawns where turf is thin use half the quantity.

Autumn is the Time to make a Good Lawn.

CROCUS

The Crocus is one of the first bulbs to flower in the Spring. Fine for house culture in pots. Plant about 6 in a 4 inch pot. Do not force too fast, keep them in a cool place until ready to flower, then place them in sunlight. They are very attractive planted in the lawn. Plant not over 2 inches deep.
